Optum

Assurance Reimbursement Management™

Introduction

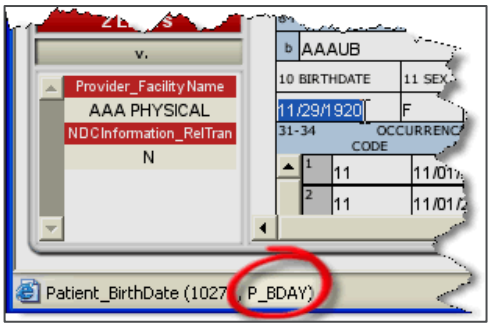

In its *Error Category Analysis* chart, the ***Operations Dashboard*** groups errors on related fields into categories. This document contains two tables that map claim fields to error categories. One table is for the UB form, and the second table is for the 1500 form.

Notes:

- *Uncategorized Errors* is an error category. It does not mean that no error category was assigned to the field. Because all CMN and NCPDP fields are in the Uncategorized Errors category, the bulk of fields in Uncategorized Fields are 1500 fields.
- Items in red text are the most recent updates (through 8.5.3 release).

Locating fields in CFI

In claim form interface (CFI), the legacy name of the field that has been selected shows in the Status bar at the bottom of the form:

If you need to locate a field named in this document on the claim form, use the *Go To Fields* tool ( ) in the CFI toolbar.

1. Open any claim of the correct form.
2. Open the Go to Fields list.
3. Click the Legacy ID column heading to sort by legacy name.
4. Slide down to the legacy name and double-click it. The cursor will jump to the field.

UB fields

Field Name (UB)	Error Category Name
ACC_ST	Claim level information
ADM_DATE	Service dates
ADM_DIAG	Diagnosis
