1942 - 276 Request Detail Report

The 276 Request Detail report provides information about when the claim's last 277 Response was received and when the next 276 Query will be sent to the payer. Our clearinghouse sends an automatic 276 for each claim sent to payers that can accept 276s and return 277s. At set intervals another 276 will be sent until the claim is finalized.

- The report shows claim identification information, the LOB and Payer name, and the date set that shows when the claim was released, when the last 276 was sent, and when the next 276 will be sent.
- When a 277 that indicates the claim is finalized is received, the next 276 is cancelled. The Next 276 Date will be empty
- Each group of codes contains a count and amount of Category code *occurrences*. Each time the Category code is found, the count and amount increase. Therefore, these counts and amounts will not usually match the Unique Claims and Claim Value at the top of the page.
- The overview is followed by sections that break out each group of Category codes to show each category/status code pair from the 277, their description, plus a count of occurrences and amount affected by the code pair.
