1241/1441 Eligibility Request Status Report

This report shows the claims for which a 270 request was sent. It is available for either Unreleased or Released claims in both PDF and CSV format. The report begins with the standard Claim Filter cover page and includes the following data in its body:

- PAT CTRL NO - the patient control number linked to that claim associated with the request
- PATIENT NAME - the name of the patient on the claim associated with the request
- PAYER - the name/ID of the payer responsible for the claim associated with the request
- RESPONSE - "yes" or "no" indication of whether or not a 271 response has been received on the latest request
- CLAIM DATE - the date the claim was saved in the product's claims database
- REQUEST DATE - the latest date a request was made on the claim for the payer
- AMOUNT - the dollar amount of the claim associated with the request
- # OF REQ - the number of requests made on the claim for the payer (not the number of claims)
- LAST REQ AGE - the time elapsed since the last request was made on the claim

The report concludes with a section that provides totals by:

- TOTAL AMOUNT - total dollar amount of all current requests (sum of unduplicated amounts)
- CURRENT REQUESTS - total number of current requests sent (sum of detail lines)
- RESPONSES RECEIVED - total number of responses received on current requests (sum of Ys in RESPONSE)
- REQUESTS PENDING - total number of current requests sent with no response yet received (sum of Ns in RESPONSE)

A detail line may reflect multiple requests made for a given claim for a given payer. If requests for that claim were sent to more than one payer, it can appear more than once for each. For this reason, you may see duplicated claim amounts followed by an * in the detail section of the report. The summary, however, does not include duplicated claim amounts--it is an unduplicated total.
