1243 and 1443 – Eligibility Response Status Detail Report

The *Eligibility Response Status Detail* report shows the current eligibility status of all claims in the working group that have an eligibility response attached to them. If the *Eligibility Response Status Summary* and the this Detail report are created using the same filter, this report provides the details about which claims contain the codes shown in the Summary report.

- Each section begins with a line that shows a code and its description. The order of the codes matches the order in which they appear in the *Eligibility Response Status Summary* report.
- Each code description line is followed by a list of claims whose current eligibility status is described by the code.
- The claim list contains demographics as well as dates that show the release date, the response date, and the value of the claim. (If the claims are unreleased claims, Release date will be empty.
- The last section of the report shows all claims whose current eligibility status is an eligibility response that contains a benefits status instead of a reject code.
