1233 Held Claims Detail II Report

Shows all claims in the selected group that are being held by a code in either Hold Code or Release Status.

- The report displays the count and amount of claims held by each code.
- Codes are grouped by the field that contains the code: the Hold Code field or the Release Status field.
- If the Hold Code does not have a defined description in the system, then the report will display a Hold Note, if present. If your report contains *No description available* in the Description column, use *Hold Code* on the Maintenance System Administration menu to add descriptions to the codes.
- ***Filter Tip*** If you hold claims with codes in Release Status and Hold Code: To include all claims that contain a hold code, use both user-selectable lists on the Advanced Claim Filter. In one list, select Hold Codes and enter the search string that will get the hold codes that are in Hold Code. In the second list, select Release and enter the search string that will get all hold codes in the Release Status field.
- This report is also available in a delimited format (CSV) for export to external programs.
- To see just a claim count and amount summary for each code, use the same filter to run this report and the **Held Claims Summary report**.
