1821 Medical Necessity Edit Errors – Detail report

Provides claim information for each Medical Necessity error in the working group of claims.

- The claims that contain Medical Necessity errors are grouped by error type.
- To aid in resolving the error, each claim display shows all the Diagnosis Codes on the claim followed by the Procedure codes that violate the LMRP. If descriptions are available, they will be included.
- Each error type is totaled to provide a snapshot of the count, amount, and policies involved.
- The three error types shown on the report are:
  - *Open Errors* – Claim cannot be sent until these errors are corrected.
  - *Manual Override Errors* – A user has overridden these errors. If the claim is otherwise clean, it will be sent to the payer with this error on it.
  - *Warned Errors* – These errors are downgraded to warnings by claim processing. Your site has indicated that claim validation should ignore these errors. If the claim is otherwise clean, it will be sent to the payer with this error on it.
