Medicare Beneficiary Identifier report (1915) file map

The Medicare Beneficiary Identifier report is a delimited file that contains the patient's original HIC number and the new MBI assigned by the Centers for Medicare and Medicaid Services.

- The native file extension is .CSV.
- The file is sorted by patient name.
- It can only be created manually. The report will use the default delimiters defined in Reports > Report Setup > Report Options.

Sample file output:

Col	Notes
Patient Name	Format: Last Name, First Name
Control Number	
Billed Amount	
Statement From	
Statement Thru	
Claim Received	Remit value in Loop 2100, DTM02 when the DTM01 qualifier code is 050.
Original HIC#	
MBI	The targeted remit must include an MBI value to be included in the report records.
