1102 – Discarded Claims Report

This report lists claims that were in the named claim submission file, but not placed in the product database. Included with each claim is reason it was discarded. The claim list is followed by a total count and amount for the discarded claims.

Most reasons for discarding a claim are the *Advise* reasons: a rule that has been set for the site. When a claim is discarded by a client specific bridge routine, the **Reason** column lists Advise with the routine type. The column lists Advise with no routine type if the claim was discarded by a split routine file. If your site routinely discards claims, you may want to created a *Discarded Claims* report auto-module and add it to the auto-list that is triggered by your claim submission process.
