1604 – Payer Alias Report

The Payer Alias report lists alternate identifications that a client has attached to official payer names used by the clearinghouse. Alternate identifications for payer names are known as payer aliases and are maintained on the Payer Alias master. A payer alias can be a name, a payer ID, or a custom ID. The alias provides the lookup used to associate the payer name on a claim (Client Spelling, Payer ID, or Custom ID) with the official name required by clearinghouse processing (Payer Name). The report contains one line for each client name.

(For detailed information about payer alias, see the Help attached to the Payer Alias Master page.)
