1103 – Submitted Claims Balancing Report

The Submitted Claims Balancing report tells you where your claims are. It contains two sections: Submission Summary balances the claims in the files you have submitted against the claims that are in the database. Current Status shows you where those claims are at the time the report is created.

- Each file submitted in your selected date range has its own set of lines in the Submission Summary and a corresponding set in the Current Status section. The first line of the set contains the name of the submission file.
- *Discarded* claims are claims thrown away by rules you set. Split claims are claims that are made from an inbound claim by the bridge process.
- *Stored Count - Split Count + Discarded Count* should equal *File Count*
- Submission Summary, the counts in the *Submitted State* section reflect the state of your claims immediately after they were stored. A high Accepted count means a high number of claim that no one needs to work before they can go to payers.
- For each day in the range you selected, the counts and amounts from the submission lines are totaled. The Submission Summary section ends with a *Grand Total* line that reflects the claims submitted in the date range you selected.
- The Current Status data begins on a new page after the last of the submission data has been reported.
- Like Submission Summary, the data in Current Status is organized by submission file, by date.
- *File Count* and *Stored Count* here should equal the same values from the Submission Summary section.
- Counts of unreleased claims are followed by counts of released claims.
- *Total Active Unreleased* and *Total Active Released* are the counts of claims that can be opened in CFI.
- The claims reflected in the Deleted counts can be reported on, but not opened in CFI

SUBMITTED CLAIMS BALANCING REPORT

Submission Summary

Date Time	File Type	Bridge Key	**File Count**	File Amount	Discarded Count	Discarded Amount	Split Count	**Stored Count**	Stored Amount	Accepted Count	Rejected Count
		Inbound File Statistics									
12/10/2008											
File Name:	[Name of Claim Submission file1]										
05:13:00	UB	837i	**133**	37,133.45	0	0.00	0	**133**	37,133.45	0	133
File Name:	[Name of Claim Submission file 2]										
07:34:50	1500	837p	**45**	3,298.00	1	34.50	2	**46**	3263.50	23	22
Date Totals			**178**	**40,431.45**	**1**	**34.50**	**2**	**179**	**40,396.95**	**23**	**155**
Grand Totals			**178**	**40,431.45**	**1**	**34.50**	**2**	**179**	**40,396.95**	**23**	**155**

Balancing:
File Count should match your HIS count
Stored Count is the number of claims in the database.
