1840 DE: General Error Count Report

This report shows all errors from all sources on a claim at the time the report is generated. To use as a tool to evaluate trending in number of errors on claims by source of error, add this report to an auto-list that is triggered by claim submission. To include only claims from the most recent claim submission, use a filter that includes *Status: Last Local* and set the code to 100.
This report is also available in delimited format for import into an external program. (Click CSV in Create Reports)
