Assurance Reimbursement Management™

Released DE pended claim aging detail (1844) file map

The Released DE: Pended Claim Aging Detail report provides visibility for monitoring and prioritizing aging pended claims.

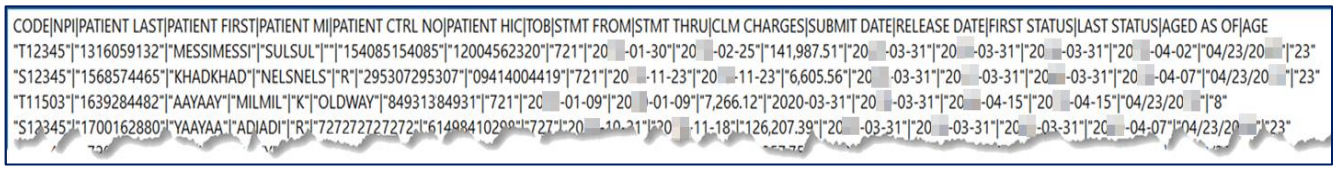

Containing Medicare claims that are in a suspended or RTP status, this report includes the number of days each claim has been in a pended status. The pended age is calculated from the first date that the Status: Local Code 991 is imported through the current date.

1. The native file extension is .CSV.
2. All date formats are MM/DD/CCYY.
3. The file reflects the following sort orders:
    - **NPI:** numeric, smallest to largest
    - **AGE:** numeric, smallest to largest
    - **CLM CHARGES:** numeric, smallest to largest
4. The report can be created manually or in an auto module.
    - The name of the auto module process is Released DE: Pended Claim Aging Detail.
    - The report will use the default delimiters defined in Reports > Report Setup > Report Options.

The filter that this report is based on reflects the following:

- Claim state field defaults to released and can't be changed.
- The date field defaults to "date released" as the current date.
    - The release date may be changed to a different date range.
    - The type of date field may also be changed.
- Specific reason codes of T (RTP), S (suspense), or both may be filtered for.
- Other parameters (e.g., NPI) may be set.

Sample file output:
