MNRA EOB (from the Claim + MNRA report)

This page is a sample of the MNRA EOB created by this product. When you select a *Claim + MNRA* report, the EOB that is paired with each claim is in this format. Use *Claim + MNRA* when billing secondary claims to commercial payers. When printed from *Create Reports* or an *Auto-List*, the report contains secondary/tertiary claims with originating EOBs. When printed from CFI, you have the option to print the open claim with either its current or source remit.

Notes:

- ALLOW/REIM + AMOUNT = CHARGES.
- If a claim has no remit associated with it, the EOB page will state "No Explanation of Benefits".
- This report prints in the font you have configured for the EOB Form Type. To adjust the size and type to your site's viewing preference, use Print Options.
