1315 – Claim Regression Report

The Claim Regression Report is a modified Field Error Summary report that contains identification for each error in the group of claims and provides the Patient Control Number and Patient Name from one claim that contains the error.

It is followed by summary statistics about the percentage of errors and errored claims in relation to the *entire group of selected claims* instead of in relation to the count of rejected claims in the group.

Field Name	Edit ID	Cond
ATT_NPI	e2395_01	NONE

ERROR When the Attending Physician Name is entered, this field is required.

PATIENT CTRL NUMBER	PATIENT NAME
2222233333	HYDE, BARBARA

Field Name	Edit ID	Cond
